

Submitter: Cliff Lehman  
On Behalf Of:  
Committee: Joint Committee On Semiconductors  
Measure: SB4

Dear Committee Members,

Respecting and maintaining the urban growth boundary is more important than incentives for huge semiconductor companies. Protect farmland, watersheds, forestland and rural communities need to keep the protective shield of the urban growth boundary. Please do not take the easy way out — space can be found inside the boundary!

Thank you for your work.

And thank you for your consideration.

Sincerely,  
Cliff Lehman
