House Committee On Climate, Energy, and Environment

Measure, Appointment or
Topic:

HB2961

I strongly support HB 2961, EV-Ready Expansion Bill. With 40% of Oregonians being renters, this bill will open up the possibility of owning an EV to a large segment of our population who currently cannot access home-charging. The climate crisis is upon us, and it is urgent that we take action to reduce carbon pollution. EV adoption is a significant part of that. Later is too late!
