

Submitter: Alice Shapiro  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or HB2961  
Topic:

This testimony is in support of HB2961, requiring new residential construction of multi family residences to include EV charging stations. I believe this is a necessary step towards enabling people to own electric, rather than conventional (greenhouse gas emitting) vehicles. In the past, Oregon has often led the way in keeping our way of life healthy and viable. It is essential we do everything we can, on as many fronts as we can, to cut the emissions that are driving climate change. This bill would go a long way toward enabling people like me to be able to drive an electric vehicle.

Thank you for your consideration.

Alice Shapiro
