

Submitter: Susan Pellicano  
On Behalf Of:  
Committee: Joint Committee On Semiconductors  
Measure: SB4

I oppose the proposal for a semi conductor plant next to Charbonneau. It would definitely affect the quality of life. Plus there is zero infrastructure to support this endeavor. The roads are already clogged in Wilsonville and on Miley road at peak times. There is no mass transit available to Wilsonville. There is a passenger train the connects to Max in Beaverton. But the passenger train shares a track with freight trains. The passenger train DOES NOT RUN FOR ABOUT FOUR HOURS MID DAY. There is no infrastructure to support this!
