

Submitter:

Tamara Dunn

On Behalf Of:

Committee:

House Committee On Climate, Energy, and Environment

Measure, Appointment or
Topic:

HB2961

As a homeowner and EV driver, having easy (overnight) access to charging my vehicle + a charger at my workplace has been paramount in making electric driving feasible for my household, and not relying on seeking out available chargers around town. Supporting this EV charging capacity in new development will really help continue the progress of electrifying our roads and making this transition accessible to more individuals and demographics.
