Home repair IDA opened in 2022

"As a single mom it took everything I had, including all of my retirement to purchase a home. I could not afford a newer home, but was able to purchase a condo that is built in the 70s. Being that old of a condo, the windows needed to be replaced, they were metal framed and very thin. This was very expensive on my heating bill. With the funds from the IDA program, I was able to have new windows and sliding glass door put in. This helped incredibly a lot with my heating bill. I hope to be able to utilize this program again to help do more upcoming important repairs.

As a single mom it has helped us tremendously in cost having new windows and door.

The program had so much help and classes available for me to learn how to maintain a house, save money and stay out of debt."
