Measure, Appointment or Topic: HB2305

I'm writing to oppose the three strike rule in conversation. A person/unit can receive strikes from any bias landlord. For example, noise. In this instance, if the tent was to receive a strike due to noise levels. There's not captured volume documented on a noise meter. In simpler terms, someone people find a restaurant or retail store to be "loud," but who's to say what volume is "comfort."
