

Submitter: Evelyn Whitlock  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB2961

Dear House Committee on Climate Energy and the Environment,

Please SUPPORT HB 2961 to require expanded electric vehicle (EV) charging capacity at new commerical, multi-use and multifamily buildings.

Ease of access to charging stations is important to increase uptake of EVs by renters and commuters; this step will help Oregon to meet our climate goals to reduce our greenhouse emissions and pave the way for a healthy, sustainable future for all Oregonians. As a very happy EV driver for more than 5 years, I know that access to easy charging has been key. I am lucky enough to have support for home charging at my residence and I have saved a lot of money as a result.

Please support HB 2961 and thank you for your legislative service,  
Evelyn Whitlock
