

Submitter: Jennifer Harvey  
On Behalf Of:  
Committee: House Committee On Education  
Measure: HB2895

Children who experience disabilities in our community would benefit from the removal of a cap on State resources for Special Education . The removal of this cap allows districts greater resources to help our children. The removal of this cap would also help Oregon become a leader in Special Education, perhaps attracting much needed educators. Strong Special Education programs help all children, families and communities. Please support this bill for the greater good and the future investment in education for Oregon.
