

Submitter: Carol Stanford  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HB3414

Please keep Oregon a great place to live by opposing HB3414. Land use rules are there for good reason. This type of legislation merely enables developers to wreak havoc on the livability of our cities and towns. In addition it contributes to traffic congestion with negative impacts on air and water quality. Thorough environmental impact reports should be required for all types of development.
