**RE: HB 4058, the Emergency Heat Relief for Communities Bill**

Chair Marsh, Vice Chairs Hudson, and Smith and Members of the Committee:

Thank you for the opportunity to provide input on HB 4058. On behalf of our thousands of members and supporters in Oregon, we would like to register the Oregon Conservation Network's strong support to pass HB 4058 to provide Oregonians better access to affordable, efficient, and safe heating and cooling during extreme weather events.

The Oregon Conservation Network (OCN) is coordinated through the Oregon League of Conservation Voters (OLCV). OCN is a coalition of 38 not-for-profit organizations throughout the state, united to advocate for pro-conservation legislation and to fight policies that threaten our state's natural legacy. OCN is powered by tens of thousands of Oregonians who belong to their membership organizations. We work to promote policies that will ensure a better Oregon for our children – and to fight policies that do not.

**We write in support of HB 4058, the Emergency Heat Relief for Communities bill which is one of OCN's Major Priorities for a Healthy Oregon for the 2022 legislative session.** OCN is partnering with Verde and the Community Alliance of Tenants to pass this and SB 1536 as part of an Emergency Heat Relief Bill package that is a direct response to the deadly and unprecedented heat dome event of 2021. Nearly 100 Oregonians died during last summer's heat dome event, many of them in their homes because they lacked access to life-saving cooling devices such as air conditioners and electric heat pumps.

HB 4058 helps address the problem laid out above by investing in emergency air conditioning and air filter deployment to compliment the Oregon Health Authority's existing wildfire work, provides heat and cooling pump incentives prioritized for low-income and environmental justice communities through the Oregon Department of Energy, and directs the Oregon Public Utility Commission to explore strategies to address energy bill spikes due to extreme weather events. The \$5 million dollars this bill provides for low-income homeowners access to ACs is a huge first step to ensuring all Oregon residents have access to life saving cooling in their homes. The \$10 to incentivize heat pumps for low income and environmental justice community members is also a major step toward ensuring equitable and sustainable access to life-saving heating and cooling technology which is crucial as climate change continues to create more extreme weather events.

**We urge you to support HB 4058 to ensure more Oregonians have access to life-saving air conditioners and better access to clean, safe, and efficient heating and cooling systems.**

Sincerely,

A handwritten signature in black ink that reads "Julia B. DeGraw".
