

## **SB 788 Oppose**

For the record I am Mickey Killingsworth from Madras, I was there to testify in person as I had a receipt from OLIS and this committee. **I also, was signed up to testify for another body on SB 77 & SB 78 and did not have authority to orally testify on SB 788. I explained it to the assistance and he sent a note up to his boss. I never got to testify on SB 788 as me. I understand what the Committee Chair was trying to do because of time limits but it wasn't fair and made it a head count hearing and now I doubt that anyone will read my testimony because everyone is so busy, which is sad to say the least.**

## **My experience with a wedding next door last fall:**

- (1) The tent company came to my farm and was tiring to set up in my pasture next to the neighbors hosting the wedding
- (2) It was an evening wedding
  - a. I moved my sheep and guard dog to the other side of the farm so they wouldn't bother the wedding and be spooked
  - b. Parking
    - i. The property couldn't handle all of the parking
    - ii. Vehicles were parked along the narrow country road and down to my entrance to a pasture.
    - iii. The parking was a road hazard for vehicles traveling West coming around a sharp corner.
  - c. The PA system was loud because it was an outdoor wedding
    - i. As the evening wore on with the reception the PA system was cranked up to out do the barking dogs and howling coyotes
    - ii. Our County has a noise ordinance that outdoor music, etc. must be off by 10 PM
    - iii. This went on until 2 AM in the morning
    - iv. If I would've called in the violation, I would be the bad guy and not neighborly. Good fences make for good neighbors when you have livestock but they don't help with this type of event.

I can't imagine having someone having wedding events next door as they want all year without regulations and requirements that a venue must follow. This would change my operation greatly and my own life.
