

Submitter: Clair Klock  
On Behalf Of:  
Committee: Joint Committee On Semiconductors  
Measure: SB4

Co Chair Sollman and Byrum, and members of the committee,  
I'm Clair Klock from Corbett and urge you to oppose SB 4. It is just another bill by  
industry and land planning opponents to circumvent our land use laws. Please don't  
let the Willamette Valley become another LA basin. Insist that industry go up and  
below ground within the urban growth boundaries. Accepting today economic gain for  
decreased future livability is wrong. Developing agricultural and forest land in not a  
sustainable model.

Thank you for your time.
