

Submitter: RONALD HEINTZ  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or HB2961  
Topic:

EV adoption is key to meeting our clean energy goals. A major barrier is access to charging. Renters, including 40% of Oregonians, struggle to find reliable charging. This bill would help overcome this barrier by requiring charging instalation of one actual Charging station in new multifamily housing above a certain size. I strongly support this sensible bill. We know this is necessary and going back later to retrofit multifamily units is expensive and wasteful. Do it right the first time.
