

Submitter: Gary Weis  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or HB2961  
Topic:

I am opposed to this legislation because; 1. It raises the cost of construction which means higher rent, 2. For financial reasons make it more difficult to achieve the Governor's goal of affordable housing low income housing and rent, 3. This is a form of taking of private property for government use, 4. Collectively and individually overburdens an aging electrical grid and generating facilities, 5. And I don't believe that low income housing residents can afford the current and future electric vehicles.

I thought the goal was to encourage the use of mass transit?
