

Submitter: Kristin Pepper  
On Behalf Of:  
Committee: House Committee On Education  
Measure: HB2895

Oregon special education is in crisis. Under funding and under staffing education for decades has culminated in a dire situation for our students who rely on us the most. Educators and school staff are continuously patching together supports and often are not meeting legal requirements guaranteed to our students and families. Do what is right and fully fund schools and especially special education.
