

Submitter:                   Cornelia Gibson  
On Behalf Of:  
Committee:                  Joint Committee On Semiconductors  
Measure:                    SB4  
  
Joint Semiconductor Committee  
Testimony Senate Bill 4  
Cornelia Gibson, 10904 SW Parkwood Ct., Wilsonville, Or 97070

I have lived in Wilsonville for 30 years and have seen the onslaught of moneyed interests and land speculators trying to develop the most verdant, prime agricultural land in the world, - the Willamette Valley/French Prairie Farmland. Development of this precious farmland for industrial use is completely unacceptable. Such development would benefit only the investors/developers and not the people of Wilsonville, Charbonneau or the People of Oregon.

The people of Wilsonville have opposed such development for as long as I have lived here. Such development can only be described as the worst use of our very precious shrinking farmland. Such development would be in opposition to Oregon's Land Use Goals and to the existing farmland zoning. Additionally, the foundation farmland of French Prairie is part of the Rural Reserve and does not have adequate water, sewer, stormwater or transportation. The proposed site would put an incredibly addtional burden the I5 bridge which is the only connection between Wilsonville and Charbonneau.

Please place such industries on non-agricultural land.

I urge you protect the foundation farmland of French Prairie.  
I urge you to remove Wilsonville from Section 10 of SB 4!

Thank you.
