

Submitter: Delbe Meelhuysen  
On Behalf Of: SaGH  
Committee: Senate Committee On Health Care  
Measure: SB1076

Are you actually serious? You now expect hospitals to do the work of the state in solving the homeless problem?. Oregon is already in the bottom 5 states for health care reimbursement. So we are already having to do more with less! We are working with less staff. And we don't have the resources to take on this huge financial and additional resource draining task. We already have a boarding problem in the ED that hinders our ability to care for the true emergencies. Is it your goal to completely finish off health care in Oregon? If so, this bill will do it. It is another way the government is seeking to not take responsibly for the problems it creates.
