

Submitter: Ashley Barnes
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or HB3172
Topic:

I support HB 3172 because I believe people deserve to gain more resources to protect their homes from fire. Home hardening is useful for protecting people's property and slowing the spread of fires. This is a way to be proactive and save money in the long run and create jobs in the process. People do not want more logging or thinning of the forests! It makes it worse for fires which are always unpredictable and more dependant on weather than anything else! We want to protect these ecosystems and find better alternatives to the outdated ways of doing things that are causing destruction. Representatives - you would be heroes in the public's eyes if you championed this point of view. You will lose our faith and vote if you do not support this bill.

Thank you.
