

Submitter: Timothy Dahl  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or HB2961  
Topic:

The use of alternatives to fossil fuel or hydro power must and will progress. Opposition to this means voting against the inevitable as well as my grandchildren's quality of life; I don't understand it.

Lawmakers need to be farther-sighted than to be considering legislation in a way to maintain the status quo. There are plenty of folks happy with that or even a proceeding backward notion! Maybe keeping them off your backs is way less important than the future for Oregonians.

And put a blue light on a pole with a telephone on it at the charging station.

Please don't heed the petrochemical propaganda. Those folks are slick bastards.

Thanks for your consideration ,

Timothy L Dahl
