

Submitter: Siobhan Murphy  
On Behalf Of:  
Committee: Joint Committee On Semiconductors  
Measure: SB4

As someone who has worked in the high tech industry and has first-hand knowledge of the environmental, occupational and community impacts of this type of manufacturing, I am opposed to the use of current rural and agricultural land for making semiconductors in French Prairie . Other geographical regions in the Portland metro area have the experience and sophistication to minimize the negative outcomes from this type of industry and our area, from what I have seen, lacks the necessary infrastructure.
