

As someone who has lived in Portland almost my entire life, and as somebody who has been impacted by the ridiculous price of housing and rent in Portland, Oregon, I urge you to support YES on SB 282-1 to protect tenants from eviction! Absolutely no one deserves to be made homeless because of the pandemic. Eviction it is one of the biggest drivers during this pandemic of spreading coronavirus.

We need more time to catch up. We need protection from displacement, eviction, and retaliation.

Please don't let COVID permanently set us back. This is an unprecedeted global health challenge and it has laid bare any quality in the United States. Please do the absolute right thing and support SB 282.
