

OREGONIANS SUPPORT INVESTING IN NATURAL CLIMATE SOLUTIONS

A strong majority of Oregonians support investing in natural climate solutions that would reduce emissions and increase the amount of carbon stored in forest, farms and wetlands.

SB 530 INVESTS IN NATURAL CLIMATE SOLUTIONS THAT WORK FOR OREGON

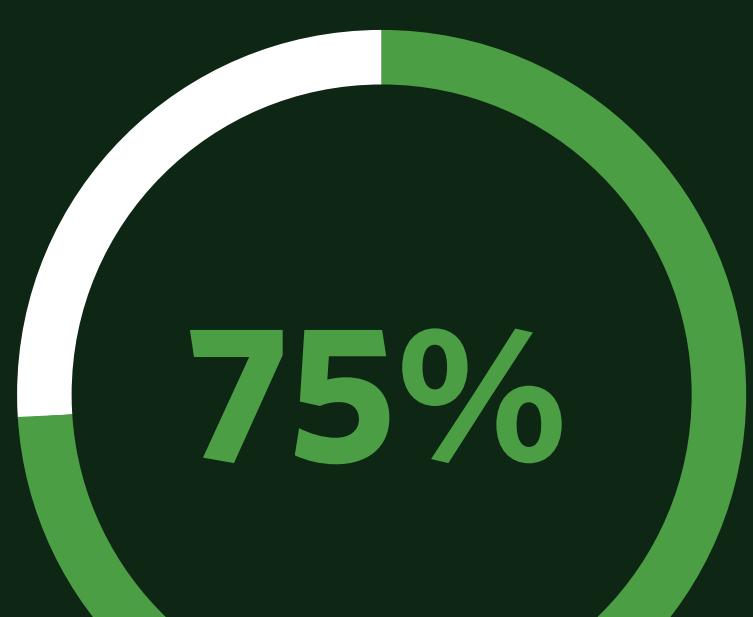

A recent survey by FM3 Research shows **72% of Oregonians support investing \$30 million to protect natural and working lands and harness their potential to address climate change.***

STRONG STATEWIDE SUPPORT

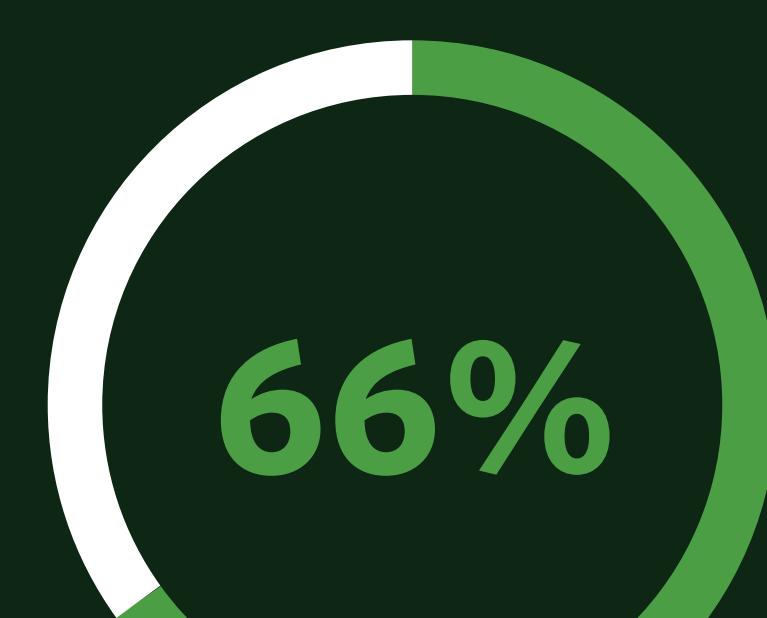

Support for climate investment was high across diverse geographic areas in Oregon:

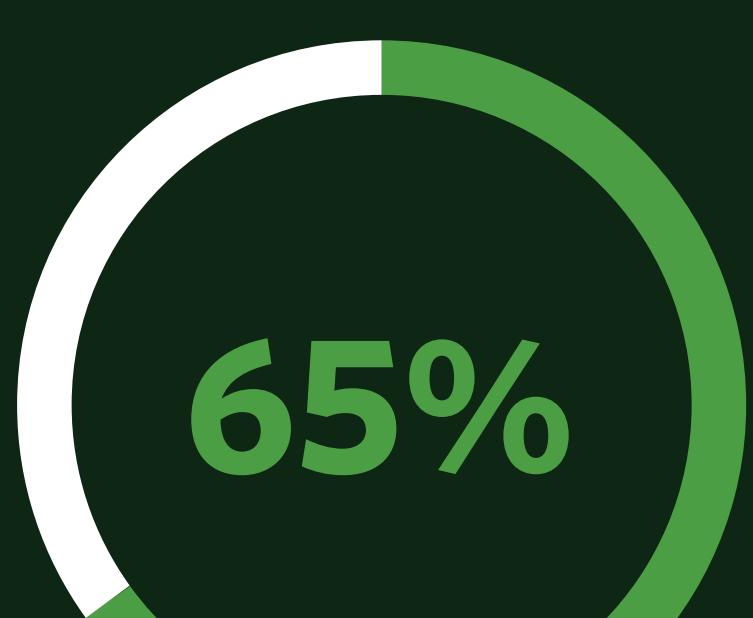

URBAN

SUBURBAN

RURAL

SMALL TOWN

A TOP PRIORITY

As part of a proposed investment in natural climate solutions, like SB 530, replanting forests and protecting water sources are **top funding priorities of Oregonians**.

Nearly four in five say replanting forests is **"extremely" or "very important."**

More than seven in ten Oregonians say the same of restoring water quality in lakes, rivers, and streams, and protecting land around drinking water sources.

Support and fund SB 530 for Oregon's Natural and Working Lands
