

I am a landlord and oppose this bill. Running a business out of a private residence can create issues with insurance and liability. It increases the wear and tear on a property. There are plenty of commercial properties available if a person chooses to run a business. It is unfair to expect a property owner to be forced to allow someone to run a business on a residential home.  
I manage 72 doors and this will create hardship for some owners  
I oppose this bill
