

Submitter: Rhonda Mumpower

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB611

Still struggling & getting some assistance since pandemic, we get a notice, rent increase \$205 per month. My work ours have only gone down. I am 58, a single mom with a school age daughter who has cystic fibrosis & diabetes. Even if i made more money she woildnt qualify for ohp for medical. Just ONE5 of her prescriptions is \$27,000 per Month! I cant afford even a copay on private insurance. Meanwhile, we are evicted! We Have nowhere to go! The hotels are going to fill up fast! The management companies have way too much power & control over our lives and basicly dont care! They dont even accept payments. Return our money, make us late and then drag us through the corupt court system without representation, but we end up having to pay for their atty fees!! It never ends! We will Never be able to rent again! Now I have no home for my kids to bring their kids to visit. NOTHING! The homeless population is forever going to get bigger if something isnt done. Stop the greed! Where do we go from here? Where?
