

Submitter: Kevin Goodrich
On Behalf Of: Common Sense
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or HB2961
Topic:

Electric Vehicles are net-negative thieves of precious energy. The REAL ECONOMY in Oregon, that which is Resource-based, has been all but destroyed by radical environmentalists hinging their "success" on Senate Bill 100. Since there is nothing left in Oregon's pockets to pay for the government's irresponsible decisions to consider EVs (do the math), our request is for Salem to ensure bringing back common sense transportation options to assist with increasing Oregon's wealth, not depleting it with "well-meaning" errors. Respects go to those legislators who know exactly what we're referring to, so thanks in advance for implementing Common Sense policies back into Oregon's economy.
