

Submitter: Theodora Tsongas
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or HB2961
Topic:

I support this bill because it would make it possible for more people to use electric vehicles as it will increase the availability of charging infrastructure in commercial buildings, especially residential buildings, making it more possible for renters to charge electric vehicles. Availability of charging stations is necessary for efforts to electrify and move away from fossil fuels for transportation and to reduce the large proportion of greenhouse gases emitted by transportation, all of which is necessary for us to reach our climate goals.
