

Submitter: Tanya Steele  
On Behalf Of:  
Committee: Joint Committee On Semiconductors  
Measure: SB4

Please do not allow the passage of SB4. Oregon farmlands are already under assault for development. Unusual steps are being taken, and exceptions to rules and laws are being requested in order to allow more development. No land seems to be safe from an exception now, basically overturning state laws that were created to protect farmland and the environment for generations to come. Please oppose SB4.

Thank you.
