

Submitter: Linda Ganzini  
On Behalf Of:  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or HB2961  
Topic:

EV adoption is key to our meeting our clean energy and climate goals. However, there are substantial barriers to the 40% of Oregonians who are renters to charging. I strongly support this bill which will open up home charging to renters in multifamily housing. The availability of an actual charging station is key to driving EV adoption among renters. It is costly and inefficient to try to retrofit charging later on.
