

Submitter: Monica Carp
On Behalf Of: Pasadena and Canyon Adult Family Home
Committee: Senate Committee On Human Services
Measure: SB1591

I have provided care to elderly for 23 years into the Adult Care Home Setting. I also have care experience into bigger long term care facilities . I love what I do and I believe the Adult Foster Care Setting promotes best quality of care by comparison. This is because in our homes the care providers and residents get to have a "family like" relationship, there is significant more continuity of care and attention to the detail since the Provider is an occupant in the home. Residents get a "home like" environment that is the closest they can get to the homes they previously lived in independently.

Having the potential extra 2 beds would be huge help to Licensee/ Provider being able to hire more staff so the quality of care offered would be even higher by reducing the resident / CG Ratio.
