

Submitter: Heather Gray
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or HB2961
Topic:

I strongly oppose HB 2961. We the people of my precinct are over-taxed, over-burdened, and suffering tremendously. This is not the way that the people's monies are to be spent. We don't need greater strain on the electric grid, which is powered by fuels that work and make civilization possible. EVs are a joke, inefficient and no better environmentally than anything else, made of petroleum-based plastics; and their batteries degrade quickly, leaving toxic garbage.
